

EBM Engineering

Company Profile

EBM ENGINEERING CO.

Safeguarding Your World.

Who We Are

EBM Engineering is a specialist in **Fire Protection, HVAC, and Electromechanical systems.**

With over 15 years of experience in supply, installation, and maintenance, EBM Engineering has contributed to landmark projects across **the Kingdom,** including **the Haram, The Avenues, and KSP.**

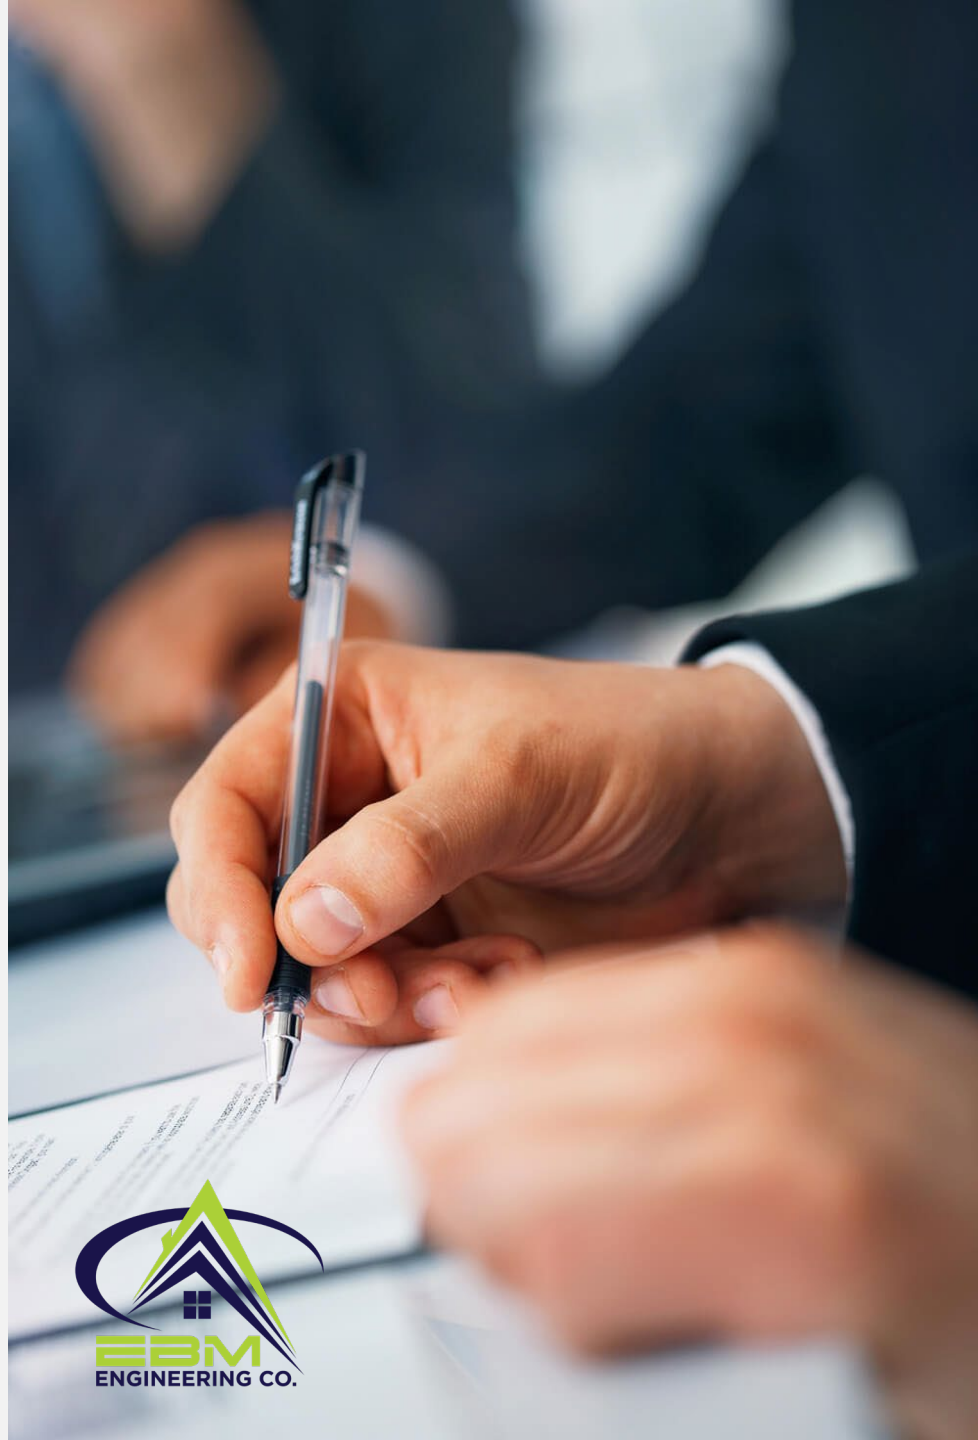

A Message from the GM

From the very outset, I had a vision of making EBM Engineering Saudi Arabia a notable name in the industry in which we operate and provide services. We've grown steadily and eventually established an extensive network of satisfied customer range across Saudi Arabia. Our self-made philosophy allowed us to associate impeccably with our clients to be their partner of choice.

From the inception, EBM Engineering Saudi Arabia has seized opportunities through unprecedented technical expertise, reliability and competitiveness to deliver cost-effective and substantial assistance

In the supply, installation, testing & commissioning and preventive maintenance for HVAC systems, Electromechanical and Fire & Safety Protection for commercial and industrial projects. During our journey, we have never compromised on the professionalism, and quality of the services that we offer, this rewarded us the strength to overwhelm the competition and attain greater glory in the ever-changing global business landscape.

Mazen Sheet

INNOVATIVE RANGE OF SOLUTIONS

Innovative, high-quality solutions in Fire Protection, HVAC, and Air Pollution control for commercial and industrial sectors.`

End-to-end project execution with precise, timely installations ensuring operational efficiency across diverse industries.

Expert preventive and periodic maintenance for HVAC, boilers, and chillers, enhancing equipment performance and longevity.

SERVING CLIENTS WITH SINCERITY AND COMMITMENT FOR OVER A DECADE

EBM
ENGINEERING CO.

VISION
AND CERTIFICATIONS

EBM Engineering actively endorses Saudi Arabia's Vision 2030 by aligning its operations with the vision's goals for economic diversification and sustainable development. This commitment is demonstrated by EBM's achievement of internationally recognized ISO certifications for quality (9001:2015), environmental management 14001:2015, and occupational health & safety 45001:2018.

Our Contribution to Vision 2030

Supplying Key National Projects
We have delivered reliable solutions to many of the Vision's flagship developments across various sectors, including NEOM, The Red Sea, Diriyah Gate, and Qiddiya.

Expanding Partnerships
We continue to strengthen our relationships with leading international manufacturers to ensure our offerings meet the highest global standards.

Product Innovation And Readiness
We continuously evolve our product range to meet the growing demands of Vision 2030 projects in terms of sustainability, efficiency, and safety.

Sustainability at EBM Engineering

At EBM Engineering, we believe that our world depends on clean, healthy air and that our solutions must be both energy-efficient and environmentally responsible. We are committed to ensuring that every product we develop aligns with the principles of sustainability, delivering high performance while minimizing environmental impact. Our approach is rooted in the Environmental, Social, and Governance (ESG) framework, and through this commitment, we not only support global sustainability goals but also drive innovation and set new standards across the ventilation and air movement industry.

Sustainability at EBM Engineering

Responsible Enterprise

- Ensuring an ethical and responsible business
- Zero tolerance for corruption
- Taking responsibility in our supply chain

Sustainable products

- Develop leading energy efficient solutions
- Improving indoor air quality
- Life cycle approach to reduce environmental impact

Sustainable Workplace

- Sustainable workplace
- Promote employee
- development
- Equal opportunities with an inclusive culture

Sustainable operations

- Reduce emissions of greenhouse gases
- Improve the energy efficiency of facilities
- Minimize the company’s environmental impact

WORLD-CLASS PRODUCTS

Fire Protection and Fire Fighting

At EBM Engineering, we lead the industry in providing the best brands in fire protection solutions. Our top-tier products offer unmatched safety and security against fire hazards. With a commitment to excellence, we safeguard your spaces, ensuring peace of mind in the face of fire-related risks.

HVAC

We at EBM Engineering take pride in offering a curated selection of HVAC products featuring the industry's best brands. Our commitment to excellence means you'll find top-quality heating, ventilation, electrochemical and air conditioning solutions for your every need. Your journey to superior HVAC starts here.

Air Pollution Control

As part of our commitment to sustainability, EBM Engineering introduces Air Pollution Control as a key function in Saudi Arabia. This division delivers advanced solutions to reduce industrial emissions, enhance air quality, and meet environmental standards, aligning with Vision 2030 for a greener, more sustainable future.

FIRE PROTECTION

EBM Engineering deals with a wide range of fire & **smoke curtains** and **fire protection** products to protect every type of building application.

From protecting means of escape and boundary protection to provide a building with a system that offers effective fire and smoke compartmentation.

We offer various solutions to architects, engineers, consultants and designers providing the ability to design complex buildings that adhere to fire regulations and offer protection against fire and smoke.

ACME

FIRE PROTECTION

Fire & Smoke Curtains

Smoke curtains are made from fiberglass and use a specific coating that is created to prevent the curtain from emitting gas or additional smoke. Fire curtains also contain fiberglass filaments and a special coating like smoke curtains but require stainless steel thread that allows them more resistance to direct flames and higher temperatures.
Applications: Hotels, hospitals, mall, schools, etc.

FIRE PROTECTION

Smoke
Fans

Smoke exhaust fans are engineered to efficiently extract large volumes of hot smoke during fire emergencies, enhancing visibility and enabling safe evacuation. These systems play a critical role in maintaining tenable conditions in escape routes
and supporting firefighting efforts.
Designed for high-performance under extreme temperatures, smoke exhaust fans are typically installed in accordance with NFPA 92A.

AIR POLLUTION CONTROL

As part of our commitment to environmental stewardship and sustainable development, EBM Engineering proudly introduces Air Pollution Control as a core function within our operations in the Kingdom of Saudi Arabia.

This division is dedicated to providing advanced solutions that reduce industrial emissions,
improve air quality, and ensure compliance with local
and international environmental standards. Leveraging cutting-edge technology and industry expertise, our systems are designed to capture and control airborne pollutants efficiently supporting cleaner production processes and healthier communities.

Through this function, we continue to align our services with the Vision 2030 goals for a greener, and more sustainable future.

Pollution Systems
INTELLIGENT AIR SOLUTIONS

AIR POLLUTION CONTROL

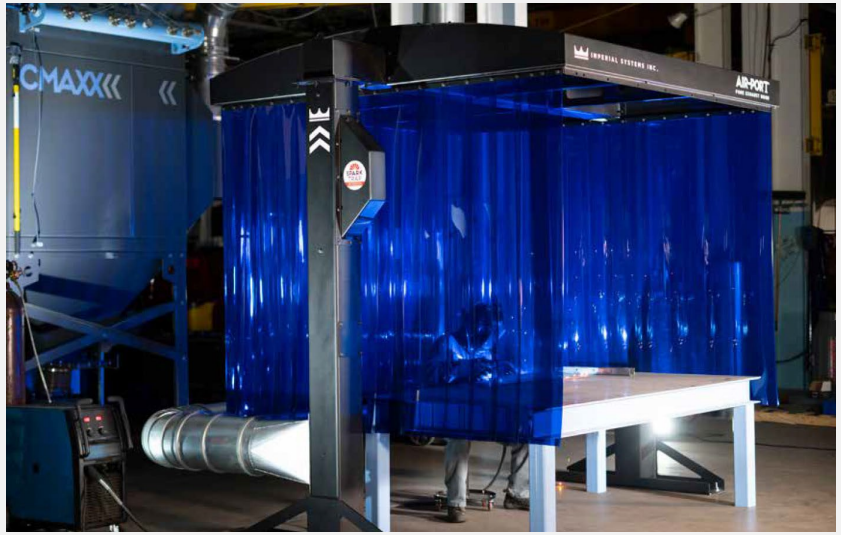

Dust, Fume & Mist Collector

Dirty air is pulled in from duct work and particulates are captured by the Delta MAXXTM filters. The clean air is pulled through the filter media and up into the clean air plenum. The air then exits the collector and goes to the return air duct. Compressed air pulses down into the filter cleaning it from the inside out. The dust cake built on the filter is then knocked down into the grating below or into a hopper.

- Fabricated Y and T strainers.
- Conical Temporary Strainers.

SPECIAL PRODUCTS

Diesel Gensets

EBM Engineering partners with Ausonia to deliver high-performance diesel gensets ranging up to 3000 kVA, designed for critical sectors including healthcare, telecom, and infrastructure. These advanced generators are engineered for both reliability and environmental resilience including configurations for extreme environments, soundproof enclosures for urban use, and hybrid options with solar integration. By adopting these solutions, EBM ensures continuous power supply while aligning with global goals for operational efficiency, safety, and sustainable energy infrastructure.

SPECIAL PRODUCTS

Solar Panel Systems

Powering tomorrow's buildings

Energy is central to modern design. Our solar systems provide reliable performance in harsh climates, cutting operating costs while supporting sustainability goals. They are scalable, adaptable, and built for long-term returns.

INTERIOR ARCHITECTURAL DIVISION

Expansion Joint Cover Systems

Engineered for movement, designed for strength

Every building moves. Our expansion joint cover systems absorb that movement while protecting surrounding finishes. They keep floors, walls, and ceilings safe from thermal shifts, seismic loads, and heavy traffic while preserving a seamless look.

Wall Protection Systems

Hygiene built into every surface

In high-traffic environments, every surface matters. Our wall protection systems defend against daily impact while supporting hygiene and safety standards. From corridors to patient rooms, they combine strength with easy-to-clean finishes.

Vinyl Flooring

Performance with style built in

Floors carry the weight of a building’s design and daily use. Our vinyl flooring offers durability and safety while creating attractive, comfortable interiors.

Entrance Matting Systems

First impressions built to last

Entrances face the toughest wear. Our matting systems stop dirt and moisture at the door, protecting floors, reducing cleaning, and keeping spaces safe and presentable.

PROUDLY PROTECTING MECCA
A SUCCESS STORY IN FIRE SAFETY INNOVATION

coopers
SMOKE AND FIRE CURTAINS

Saudi Binladin Group

Location: Great Mosque of Mecca Tunnels, Saudi Arabia
Product: SmokeStop D600A Smoke Curtains
Scope: 2 km of bespoke smoke curtains
Award: ASFP Best Installation Project (2nd consecutive year)

PROUDLY PROTECTING MECCA
A SUCCESS STORY IN FIRE SAFETY INNOVATION

Project Overview

Coopers Fire was proud to contribute to one of the most critical infrastructure projects in the Islamic world enhancing fire safety in the tunnels beneath the Great Mosque of Mecca (Al-Masjid al-Haram). These tunnels accommodate massive pedestrian flow, especially during the Hajj pilgrimage, necessitating the highest fire safety standards.

Tailored Engineering for Sacred Ground

The tunnels posed significant engineering challenges due to their undulating ceilings and floors spanning approximately 927 meters with a maximum deviation of 9.5 meters. Coopers Fire's engineering team developed customized SmokeStop D600A Smoke Curtains that were precisely adapted to the unique topography, ensuring reliable deployment even in sections with a 3.5% slope.

Execution Under Pressure

Working in close collaboration with EBM Engineering, Coopers Fire Successfully delivered and installed approximately two kilometers of fire curtains under tight time constraints and complex site access limitations. Detailed coordination and rapid response ensured the project's timely completion without compromising safety or quality..

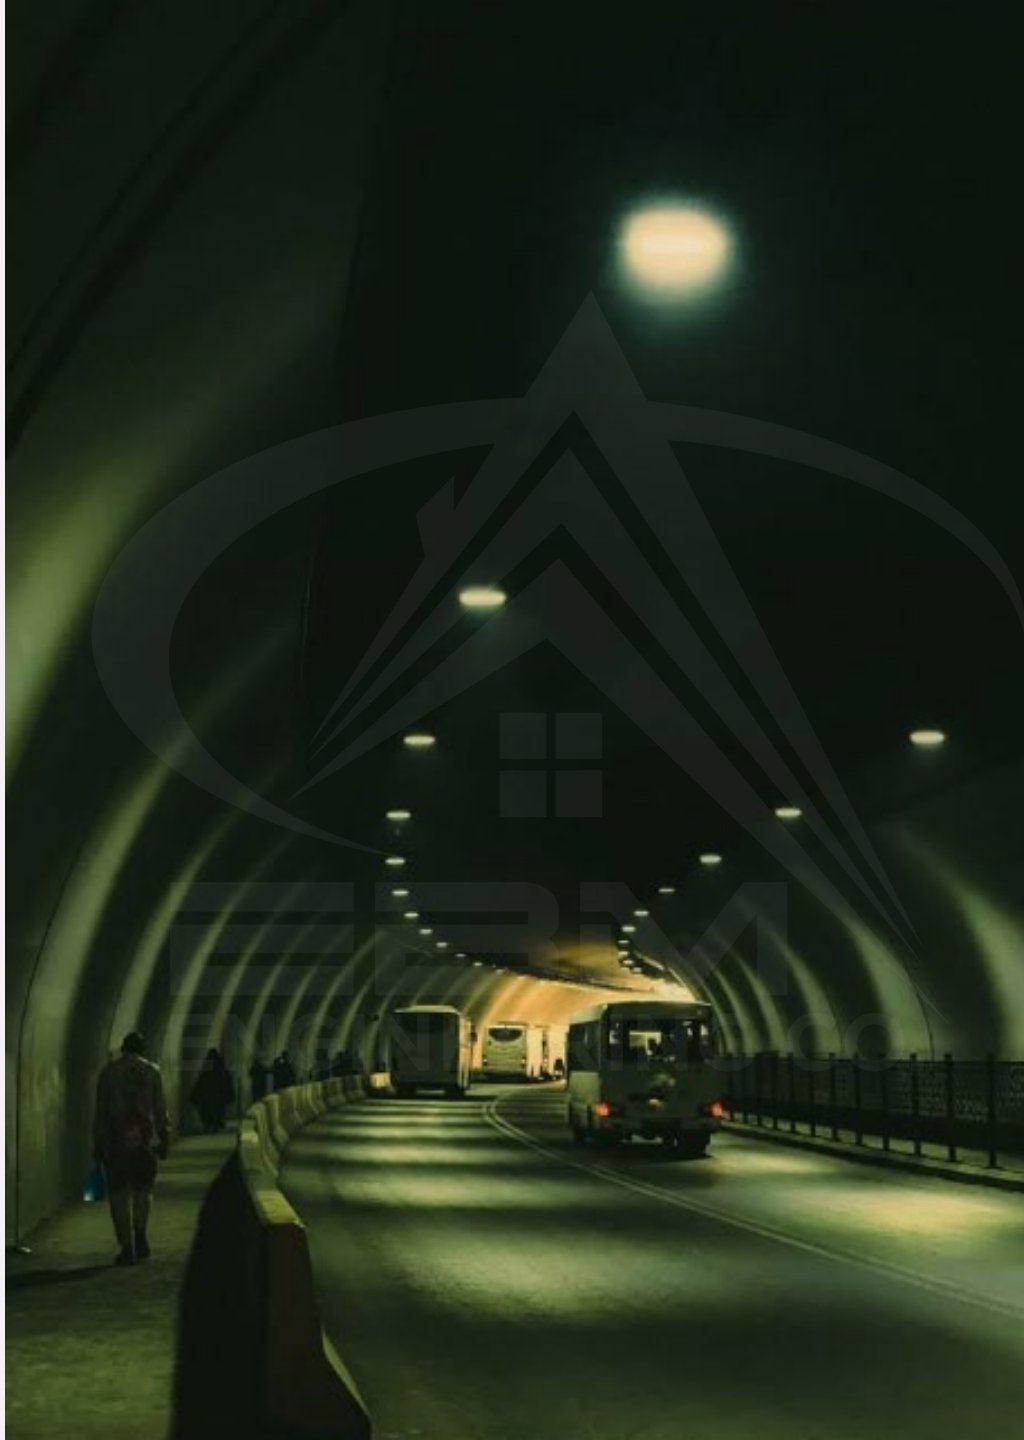

Award-Winning Impact

This project was honored with the ASFP Best Installation Project of the Year for a second year in a row, recognizing Coopers Fire’s excellence in passive fire protection. Beyond accolades, the real reward lies in safeguarding millions of pilgrims and preserving the sanctity of this sacred site.

<u>Pride</u> in *Every* Project

The Great Mosque of Mecca Tunnels project showcases Coopers Fire's proud commitment to innovation, safety, and excellence. From bespoke engineering to flawless execution, we continue to set new global benchmarks in fire safety for complex, high-risk environments.
